Mobile: +91 7358525801

Education

B.Tech in Artificial Intelligence and Data Science

2023 – 2027

CGPA: 8.0/10

Relevant Coursework: Data Science, Machine Learning, DBMS, Computer Networks, Operating Systems, Computer Vision, IoT, Deep Learning, NLP, Chatbot Automation

Experience

Machine Learning Intern, CODTECH IT SOLUTIONS PVT. LTD

Sep 2025 – Nov 2025

- Developed a recommendation system using matrix factorization and collaborative filtering techniques. Preprocessed and cleaned datasets to improve model performance and reliability. Implemented model evaluation techniques and improved prediction accuracy. Built a scalable pipeline for generating personalized recommendations

Projects

Bio-Bubble AI – Smart Plant Health Dashboard

- Designed an IoT-based plant monitoring system with real-time environmental tracking. Implemented Gradient Boosting model to predict plant stress and provide recommendations. Developed interactive dashboard using HTML, JavaScript, and Chart.js. Enabled remote irrigation control with automation and manual override. Integrated ThingSpeak cloud for real-time data storage and analytics

Nyaya Mitr – Multilingual Legal AI Assistant

- Built a multilingual AI legal assistant supporting voice and text interaction. Designed and implemented a RAG pipeline for IPC, BNS, and CrPC legal retrieval. Integrated LiveKit for real-time voice communication and TTS output. Leveraged LLMs (Gemini API) for contextual legal reasoning. Developed end-to-end pipeline from speech input to legal response generation. Provided guidance for FIR filing, bail procedures, and legal awareness

W.A.T.C.H – Wildlife AI Tracking and Conservation Hub

- Developed AI-based wildlife monitoring system using smart camera traps. Implemented YOLO/CNN models for species detection and behavior analysis. Integrated GPS and RFID for tracking animal movement. Built intrusion detection system for anti-poaching alerts. Designed scalable cloud-based data processing system

Skills

Languages: Python, C, C++, Java, R

Databases: MySQL, SQLite, MariaDB

Technologies: TensorFlow, YOLO, OpenCV, LLMs, Agentic AI, Streamlit, LiveKit, TTS, RAG Pipeline

Core Areas: Machine Learning, Deep Learning, NLP, Computer Vision, IoT Systems, AI Automation

Achievements

– Runner-up, Chakravyuha 1.0 (AIML Domain)

March 2026

Developed *Nyaya Mitr*, a multilingual AI legal assistant supporting 5+ Indian languages using voice and text interaction.

Awarded Rs. 2500 for innovation in AI-based legal assistance systems.

- **Runner-up, Innovathon 4.0 (SDG Goal 13 - Climate Action)** April 2025
Built an AI-driven solution addressing climate-related challenges with sustainable system design.
Awarded Rs. 1500 for impactful implementation.
- **Runner-up, Solevathon 4.0 (SDG Goal 15 - Life on Land)** March 2026
Developed *W.A.T.C.H.*, an AI-based wildlife tracking and conservation system using computer vision and IoT.
Secured 2nd place for innovation in environmental monitoring and conservation.
Awarded Rs. 1500 prize.

Position of Responsibility

- Mentored junior students in AI and Machine Learning during Festive Week
- Organized MLOps workshop under guidance of HoD Dr. Su Suganthi
- Guided peers in ML model development and deployment practices
- Contributed to organizing technical events and knowledge-sharing sessions

Certifications

- Big Data and Analytics with Lab – HCL GUVI
- Design and Implementation of Human-Computer Interfaces – NPTEL IIT Guwahati (Score:64%)
- Entrepreneurship – NPTEL IIT Guwahati (Score: 78%)

Declaration

I hereby declare that the above information is true to the best of my knowledge and belief.
